VOLUME XXXV NO. 24

CROSSFIELD, ALBERTA, CANADA, THURSDAY, MAY 8, 1941

5 CENTS A COPY

FESTIVAL AT OLDS

A large number of students from the local school are leaving tomorrow morning, Friday, to take part in the School Festival being held in Olds. Competition will be keen and numerous as contestants are entered from the various schools north to Bowden.

Entries from Crossfield are as follows: Solos, Grades 1, 2, 3 — Shirley Fike, Beryl Patmore, Neil Bannister, Ralph Rills, Lola Nichol. Solos, 4, 5, 6 — Eileen Anhorn, Mary Fieldhouse, Barbara High, Fern Patmore, Lorraine Nichol. Solos, 7, 8, 9 — Leta Stafford, Alice Hall, Betty Huston. Solos, 10, 11, 12 — Marion Robinson.

Duets, 7, 8, 9, — Vivian Lind and Maxine Mar, Betty Huston and Helen Hurt, Alice Hall and Leta Stafford.

Trio, Cora Hall, Nora Fleming and Claire Metheral.

Several choruses are also included in the entries.

Parcels Reach War Prisoners

The first letter from a British prisoner of war in Germany giving proof that food parcels sent from Canada were being received and enjoyed in a German prison camp, was read to the Central Council of the Canadian Red Cross.

Guardman Arthur Hook, taken prisoner at Dunkirk, wrote his sister, Miss Wynne Hook, 2148 Grand Boulevard, Montreal: We have just received an issue of Red Cross parcels (My third since I've been prisoner). Some chaps were extremely lucky and got the Canadian type. What a lovely parcel! A pound tin of butter (real butter) — honey and a host of other good things. Now I want you to see about getting me a parcel like that with one addition, — a couple of tins of peanut butter. I dream of the stuff."

Red Cross officials believe the Canadian food parcels, first to be distributed in Germany, were in a shipment of 5,000 sent in Marseilles on the American Red Cross Mercy Ship which were reported by the International Red Cross representatives to have arrived in splendid condition.

The Canadian Red Cross is packing 10,000 food parcels a week for British prisoners of war in Germany at the request of the British Red Cross.

Air Commodore E. W. Stedman, O.B.E., A.R.C.Sc. Air member for Aeronautical Engineering on Canada's Air Council.

Representing four generations, the above picture was taken during the recent visit of Mrs. E. L. Turner of Banff, at the home of her daughter, Mrs. Cameron, and Corporal D. Cameron, R.C.M.P., Crossfield. The great grandmother, Mrs. Turner, is shown on the left, with the grandmother, Mrs. Cameron on the right, and the mother, Mrs. Ralph Vetter (nee Margaret Cameron), of Carstairs, holding her seven months' old daughter, Donna Jeannine.

LOCALS

Mrs. J. Belshaw is spending a few days in Turner Valley, the guest of Mrs. Pogue.

Mrs. R. Waterhouse of Calgary was a week-end visitor at the home of Mr. and Mrs. G. J. Dawson.

Work has been completed on the erection of the two new 15,000 bushel annexes for the Alberta Pool elevator here.

Lochie McLean, who has not been in the best of health during the winter, has gone to Calgary for a short time.

Mr. Clarence Wall, who is now employed in the butcher store and grocery at Didsbury, was a visitor in town this afternoon.

The local committee for the War Services Fund Drive report further collections of \$59.44, \$54. of this being sent in by M. M. Boucher, canvasser for the Bottrelle district.

Dr. T. Powell of Calgary was in town on Tuesday, and called at the Manse for Rev. H. V. Ellison who accompanied him to a special meeting of the Red Deer Presbytery held in the city of Red Deer.

Mr. W. E. Spivey, who was stricken with a heart attack last week, is showing slight improvement and while he will have to remain in bed for some time, it is hoped that he will make complete recovery.

Rev. A. D. Currie, accompanied by Rev. H. V. Ellison, attended the district Ministerial Fellowship at Carstairs on Monday last, a good representation from all the adjoining towns being present. Rev. A. D. Currie presented the important matter of Bible reading in schools, which was freely discussed by the group and recommendations sent on to a higher channel.

VICTORY WHEEL WINNERS

Following are the winners of War Savings Certificates for last Friday afternoon on the Victory Wheel being operated at the Chronicle office.

George Lim.

The wheel is spun every Friday afternoon at 3 o'clock. Bring in your quarters — don't wait to be asked.

LOCALS

Les Spivey, of the R.C.A.F., left for the east on Wednesday after spending leave with his family here.

Mrs. Ethel Bishop of Calgary spent Sunday here with her brother, Wm. Urquhart.

Miss Alma Gordon of Calgary was in town last week end, visiting her parents, Mr. and Mrs. A. W. Gordon.

The ladies of the local branch of the Red Cross are busy this afternoon packing another shipment of finished articles to forward to head quarters.

The Senior Group C.G.I.T. held a delightful tea on Saturday afternoon, when the layette they made for donation to the Red Cross was on display. The tables were attractive with potted plants and the tea cups were read by Miss Gough.

Mrs. C. J. Urquhart of Elora was a visitor at the home of Wm. Urquhart on Friday of last week. On her return, she was accompanied by Gordon Urquhart en route to Pine Lake where he will have charge of the boats this summer.

The Social Credit Group at Water Valley held a well attended meeting last Saturday evening. Mr. Frank Laut, Independent member for the constituency, was invited to be the main speaker, giving a review of the recent session.

On Monday last, the Mission Band enjoyed an evening of lantern slides showing "Down Trinidad Way", which is the subject of their Study Book this year. The slides were quite interesting and should prove beneficial in their study of the missionary work.

Arbor Day passed quietly in Crossfield with nothing to mark it but the bank holiday. A number of adjacent towns declared a half or whole holiday to be observed as "Clean-up Day" but up to the present we have heard nothing of our village planning a clean-up day this spring. The majority of citizens have been busily engaged in gathering up and disposing of the winter's accumulation, but there still remains some streets and alleys needing attention.

World's Week

BY HAROLD L. WEIR

Associate editor of The Edmonton Bulletin and author of the daily column "From the News"

There are uneasy rustlings in every chancellery in Europe as the still free nations strive to adjust their foreign policies to the new situation created by Hitler's seizure of Greece.

A strong disposition is evinced by German agents to point out that British assistance to threatened nations is of little value alas Greece could not have fallen.

There is a reaction to this campaign of sinister inroads in Turkey where one of the principle newspapers attempted to assert, the other day, that Britain's aid to Greece was purely nominal and of small importance. Britain, and this

Harold L. Weir Turkish journal should have poured half a million men into Greece.

It is only necessary to point out two facts in reply to this ridiculous assertion. The first is this:

What would have been the sense of putting half a million men into the Greek defense when the Germans could have brought two million against them? Why saddle a defeated Greece with such a colossal army of occupation whose capacity for destruction would have been infinitely greater than the force which now holds that country?

The second fact is this: If British assistance was insufficient, why were the Greeks themselves so thoroughly satisfied with it and why did they part from the British with such high expressions of esteem?

The truth is that Turkey, terrified out of her wits by the German advance, is playing Hitler's game of endeavoring to lower British prestige in an attempt to save her own miserable skin.

If Britain did not send enough men to Greece it should be noted that Turkey, Greece's neighbor and sworn friend did not send any men at all.

All this indicates, of course, that Turkey is involved in a diplomatic swing towards the Axis. The price of her friendship is probably the Axis adoption of an alternative

SPEED THEM HOME

Canada today has nearly 200,000 men in uniform. These men are fighting for Canada. They are not strangers to us—they are our own. They are our fathers, our sons, our brothers and our cousins. They belong to us as we belong to them.

War or no war, we would be thinking of them; their problems would be our problems as would our problems be their problems. Because of our love for them we would be happy to help them. But now it's war and as they are in the thick of it, it is up to us to help them all we can.

Our prayers are always with them—prayers that ask for nothing more than that they will be spared and return to us soon. Prayers are powerful forces. So are guns and ships and planes. These ships and guns and planes are needed—the speed with which they get has everything to do with when they will return home to us. We want them back and if our giving some guns, ships and planes will do the trick, we are going to give them all they want.

Your government is asking you to invest 5 percent of your current income in War Savings Certificates. It is a loan. They are asking for the use of your money so that our men can do the job and come home. Since loaning to the government all the money we can spare will help bring our family home, what are we waiting for?

Indications warrant belief that this year's tourist season will be a good one. Bookings at Jasper Park Lodge are said to be good, the Alberta Travel Bureau reports encouraging returns from advertising investments in U.S. publications, and the visit of President Roosevelt to Canada will undoubtedly promote a general travel trend during the season. Now that Alberta is better equipped than ever to handle the tourist trade, business directly concerned anticipates a good year.

You Roll Them Better With
OGDEN'S FINE CUT
CIGARETTE TOBACCO

ONLY FIFTY YEARS AGO

The difference half a century can make! In reviewing some of the advances of recent years, we find that fifty years ago—

There was no motor delivery.
There was no mechanical refrigeration.

Butchers had no meat slicers.
There were no computing scales.
The original type cash register was just making its appearance.

Canned foods were "infants in arms."

There were no package teas.

Oil lamps were used for illuminating store interiors, and what pathetic lights they gave!

Chickens were sold by the pair.

Eggs were bought sight unseen—no gradings.

Butter was purchased in long rolls, cut off and sold by the pound.

There were no electrically operated coffee grinders.

There were no jelly powders or canned fruit juices or packaged cheese.

Farmers' wives made lye and their own soap.

And baked their own bread.

Salt was sold in barrels and big bags.

There were no corn flakes or package cereals.

There was no vegetable shortening.

There were no strained fruits or vegetables in cans.

Medical requirements for the Royal Canadian Naval Volunteer Reserve have been relaxed in order to take on the strength, men who formerly were rejected for color blindness or medical categories slightly below that usually required. A number of coded ratings will be formed into a class for training in an Eastern port. An intelligent type of man with medical requirements suitable for the writers class may apply at the naval barracks, 102 St. Edmonton.

Recruit: "Doctor, I am particularly liable to seasickness. Can you tell me what to do in case of an attack?" Doctor: "It isn't necessary. You'll do it."

Dr. K. W. Nesbitt
Director, Agricultural Department
North-West Line Elevators Association
Grain Mites

True insects, such as moths, beetles, ants, flies, bees, etc., have six legs. Mites have eight—a fact which may help to explain why they have spread so fast! For this and other reasons mites are more closely related to spiders, scorpions, ticks, etc., than to true insects.

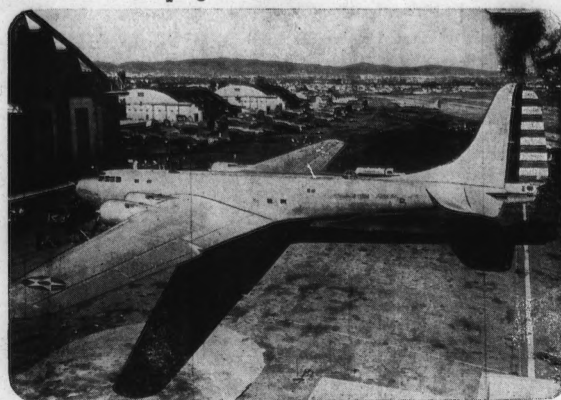

According to Dr. H. E. Gray, the female grain mite lays three or four eggs per day up to a total of about thirty. At ordinary room temperature, the life cycle is completed in about seventeen days.

When conditions are unfavourable, young mites may assume a resting stage. In this condition they are covered with a hard crust which prevents drying out. They can then live without food for months, during which time they may be blown about with dust or carried about on mice or flies. When conditions favour, they again become active and multiply.

Grain mites increase the moisture content of wheat. How? Starches and related compounds are formed in plants from water and carbon dioxide plus energy from sunlight. By feeding on dust, debris and wheat germ, mites digest these compounds thus gaining energy and giving off carbon dioxide and water. Infested grain may therefore become tough and spoil by heating. Infestations are particularly common in grain originally stored in a tough or damp condition.

Farmers should check their bins regularly. For further information, consult the local District Agricultural or Experimental Station. Government literature has been distributed to all line elevator grain buyers.

82 Tons of Flying Machine

The world's largest airplane, the 82-ton U.S. Army's four-engine bomber, known as the B-29, and constructed by the Douglas Aircraft Co., at Santa Monica, Cal., as it appeared when taken from its hangar for preliminary checks. Exten-

sive ground tests, to be climaxed by its first test flight, are now being conducted. The plane has a wing spread of 212 feet and a top speed of 386 m.p.h. Equipped as a transport, it can carry 125 fully-armed men.

Red Cross Society

Funds for mobile field kitchens to feed Britain's bombed and destitute civilians, are being called for by the Canadian Red Cross Society. The Society to date has donated a fleet of 36 kitchens to the British Government, each costing \$3,100. Three units are being allotted to each of England's 12 defense zones. At a moment's notice they are moved from a central location to the next blitz area to feed defense workers and civilians while they are fighting German air attacks.

The kitchens, which are rushed to the heart of every bombed region are driven by young English girls of the Women's Voluntary Services. Each unit, built on a four-ton chassis, is equipped with a cooking range, fuel, water, supplies of meat and vegetables to provide meals for 250 individuals. They have become absolutely essential in smaller communities where homes and restaurants have been completely wiped out by air raids.

Wife: "It's strange, but Helen and I can hardly understand each other over the telephone."

Husband: Did you ever try talking one at a time?"

WOOL WITHOUT TICKLE

A wool fixing process which takes all the "tickle" out of garments made from it has been evolved by British textile experts. People in countries with strongly contrasting day and night temperatures will therefore be able to wear woolen underwear with comfort during the day and yet have protection from chills after sundown.

The process is also the most successful non-shrink method ever devised for wool, a virtue discovered by the public for themselves; for it was a consignment recently sent to the United States without labels which attracted a second order for what they called "your unshrinkables".

A more attractive texture is given and there is great improvement in tensile strength and elasticity. Men's and woman's underwear, hosiery and knitwear, made from wool, have actually been on the market for over forty years. The latest advances are due to unceasing experiment over the whole of that time.

ONE MILLION MAGAZINES A YEAR

Bombs and U-boats have failed to stop the flow of books, magazines and periodicals from Britain.

In the month of February, the leading British firm of wholesalers, which handles about half the total trade, dispatched to overseas customers about 85 tons of reading matter, including 35,000 magazines and periodicals.

Britain's revenue from the sale of books copyrights and so on, amounts to over \$20,000,000 a year and it is striking evidence of the demand for English works abroad that this represents nearly one-half of Britain's home trade of almost \$10,000,000. Its value to Britain's war effort is shown by the fact that a book sold at, say 7s. 6 pence, costs only 3d. or so in imported raw materials.

About 75 per cent of Britain's exports go to the E. A. especially India and Malaya; the rest is fairly evenly distributed throughout the rest of the world. All kinds of books, from technical treatises to the latest popular novel, are included. In a typical parcel now on its way to Peru, for example, were: 'Their Finest Hour', Allan Michie and Walter Graebner's picture of Britain at War; Grey's 'Anatomy'; Mrs. Berton's classic 'Everyday Cook'; 'Back's Medical Adviser'; 'Aeroplane Studies'; Bartholomew's 'Atlas of the World'; and Sir Banister Fletcher's 'Comparative Architecture'.

The little city girl watched the farmer milk the only cow he had. Next morning the farmer was much excited for the cow had been stolen during the night.

Farmer: "Drat the thief that stole that cow. He's miles away by now!"

Little girl: "I wouldn't worry about it Mister; they can't go very far with it, 'cause you drained her crank-case last night."

The World of Wheat

By H. G. L. Strange

The yield of wheat is governed mainly by rainfall, which helps to make plan' food available to the growing crop.

Summerfallow, when it is done well, conserves rainfall and so makes more moisture hence more plant food available. Summer-fallow, therefore, increases yield per acre.

It can be said, then, that summerfallow is actually a method of storing wheat in the soil instead of storing it in the bin.

The increase of wheat yield on summerfallow depends upon the amount of rainfall that the summerfallow has conserved, and this depends upon how well the summerfallow is kept free from weeds (because weeds steal the stored up moisture from the wheat plant) and depends also upon how early in the season the summerfallow is done.

There will be more summerfallow done this year than ever before in the history of Western Canada. It is essential, therefore, that summerfallow should be done early—in May if possible—in order to conserve the late May and early June rains; it is also necessary that summerfallow shall be kept as free from weeds as possible, without distributing the soil any more than is necessary, because when the soil is disturbed precious moisture is evaporated into the air.

Following factors have tended to raise price: Prospects of Japanese and Manchurian wheat crops below normal—It is reported that Spain has purchased an additional 14 million bushels of Argentine wheat (payment to be spread over 5 years) — Spring seeding operations two to three weeks behind in the Balkans and northern and western Europe.

Following factors have tended to lower price: Germany has occupied Yugoslavia and Greece — Broomhall estimates surplus wheat supplies of Canada, Australia and the Argentine on April 1st were 40 per cent higher than last year—Soil conditions excellent in the Argentine and acreage unchanged from last year.

Sheriff: "Did you catch the auto thief?"

Deputy: "He sure was a lucky bird. We had chased him a mile when our 1000 miles was up and we had to stop to change oil."

COMING EVENTS

Regular meeting of the Floral U.F.W.A. will be held at the home of Mrs. O. E. Jones, Wednesday, May 14th, at 2:30 p.m.

NOTICE

Mr. E. C. Collier, LL.B., will not be in Crossfield on Saturday, May 10, as he will be attending Court in Edmonton. He will be in Crossfield the following Saturday as usual.

UNIVERSITY WEEK FOR FARM YOUNG PEOPLE

The University Week for Farm Young People will be held at the University of Alberta, June 4th to 11th. Any farm young people of Alberta, either boys or girls, between the ages of 16 and 27 inclusive, may attend. They live in the residence buildings and board will be provided in the university dining hall, the cost of same being at the rate of \$12.50 for the entire week.

Competitions with cash prizes are sponsored by some of the leading farm organization in livestock and grain judging, household economics, public speaking, handicrafts and farm cost accounting. The Department gives two \$75. scholarships to one of the schools of agriculture to the boy and girl winning the highest marks on an examination of the work taken during the week.

The annual business session of the Junior branch of the United Farmers of Alberta will be held during the week and another important event is the annual Feeders Day when valuable information is given out.

For full particulars, write the Department of Extension, University of Alberta, Edmonton.

route into Iraq that will leave Turkey unmoored.

Spain, too, is showing signs of reluctant acquiescence in Axis demands.

These changes in national policies are interesting but unimportant. Both Turkey and Spain have demonstrated themselves before this to be allies whose assistance is more of a liability than an asset.

On the other hand, Russia's readjustment to the new situation reveals some slight shift towards the British position or to put it more precisely, away from the Axis position.

Stalin suddenly published an order forbidding the transit through Russia of any and all war materials. This will cause some embarrassment to Germany and Japan.

On the top of this order there broke out in Russian newspapers a chorus of defiant statements that said, in effect, that Russia alone was calm in the face of the European tempest and that she was prepared to meet any "external enemies."

Just who these enemies were, the

Russian press did not define. But the gesture was taken as a warning that Stalin would stoutly resist any German attempt to seize all or any part of the Ukraine.

There was also an alternative interpretation of all these fine words. It was simply that Stalin was scared stiff and had instructed his journalists to whittle loudly to keep his courage up.

The Chronicle invites its readers to listen to the Saturday Night Review broadcast by Harold L. Weir over radio station CFRN (1260 kc) every Saturday night at 8:15.

ELECTRIC FENCES

The use of the electric fence has become very popular in England. All over the country, the breaking up of former pasture land has created a demand for wire, which is not available in large quantities on account of the war. In order to conserve wire, the electric, requiring only one strand, is being widely used and on account of the small fields in England, this type of fencing is very suitable.

The diversification of crops which has taken place in Alberta, due to the war, and the wider use of forage crops for pasture and hay will necessitate the use of more fences and cross fencing. Farmers faced with the necessity of building such fences might consider the electric fence as a substitute to provide a temporary enclosure for livestock. The electric fence requires less wire, reduces the amount of steel necessary, thereby releasing larger quantities for the armament industries.
